DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21 to 28, 48 to 54 drawn to an electrical component assembly, classified in class 257, subclass 778.
- II. Claims 1 to 20, 29 to 47 and 55 to 92 drawn to a method of making an electrical component assembly, classified in class 438, subclass 15+.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of drawing the flexible tape substrate through a cleaning bath before drawing the flexible tape substrate through the particle plating bath, it can be drawn through a etching bath before drawing the flexible tape through the particle plating bath.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
